

Mitsubishi VRF Diamond Designer

Introduction

Diamond Designer Seminar teaches, through the use of interactive activities, how to properly design and apply CITY MULTI VRF system applications. The attendees will learn to differentiate between the different CITY MULTI systems, proper applications of these systems, and the energy usage and cost comparisons of using the CITY MULTI systems. During the training session, the students will design a system using the Design Tool software, Diamond System Builder (DSB).

Who should attend? HVAC Design Professionals

Training Class Cost: Complimentary. Lunch will be served.

Prerequisites for the course: City-Multi product overview (online)

Class requirements: Windows laptop (Windows 10 or higher).

Links to the software downloads will be provided prior to the class.
